

Company Name:	ConsultingWhere
Team / Department:	
Address	Heath End The Common Chipperfield Kings Langley WD4 9BL

Provisional title for project:

Geospatial Use Cases in Health Sector

Short description of the problem that would be addressed by the project:

There is no documented and publicly available inventory of the use cases for geospatial data and systems in the health sector of the economy. This study would seek to document the range and scope of the use cases across the world (with particular emphasis on the developing world).

Short description of the data sources that would be used in the project, and how they would be used.

ConsultingWhere have compiled an initial list of use cases and documented the socio-economic benefits thereof. This work would look to identify additional cases, including those highlighted by the current COVID-19 pandemic. Each use case would be documented including the data sources, spatial and other analysis techniques applied, results, quantified and qualitative costs and benefits, general applicability and other useful attributes for each.

Would any work by the student need to be carried out on site at the Company with the exception of supervisory meetings?

No

Any issues of data confidentiality and IPR that would need to be resolved

Yes

Essential skills

Numerate - comfortable working with spreadsheets and mathematical formula
